CSC493 - Weekly Reports

Your name: <Nate Abebe>

Week: <week 11>

# **Part 1: Weekly Progress Report**

	Accomplishments:	What did you	accomplish since	the last class	meeting?
--	------------------	--------------	------------------	----------------	----------

I worked on how to make users sign up with emails and also create a register

I worked on on social on my frontend

Worked on the contact page and stored emails and contacts

• Challenges: What are your current roadblocks?

Sometimes Docker keeps on clashing

- **Desired Discussion Points**: Do you have any desired discussion points that are not related to roadblocks?
  - Backend progress and database with docker
- **Future Goal**: What do you plan to accomplish before our next class meeting? These plans should be related to roadblocks or discussion points. It you plan to change direction, explain why.
  - Continue on the backend development and touch few of the database

# **Part 2: Time Reporting**

Make sure that as you fill out the first prompt, you include in enough detail in the summary. For example, "debugging" is vague, but "debugged function X to make sure that when user does action Y, it is called and returns the value Z" is better.

• <b>Time Spent</b> : Briefly explain how much time you spent on your project. If you worke multiple components, each should get a detailed summary.	d on			
3hr- worked on user features and travel. And contact page				
3hr- watching tutorials.				
3hr- implementing and working with Docker and Mysql				
• Weekly Total Time Spent: Make sure to add up all the hours and minutes correctly.				
9hrs				
<ul> <li>Total Project Time Spent: After the number of hours and minutes, make sure to br     explain whether you are on track and if not, what you may need to do in order to achie     what you set out to accomplish.</li> </ul>	•			
Looking forward to work more on my project				

## **Rubric:**

The following rubric will be used, but they might change as needed.

# **Accomplishments (3 points)**

1 point for a general description of progress, 2 points for specifics on progress, 3 points for specifics AND referring to previous targets and explaining how currently accomplishments build on previous ones.

#### **Challenges (3 points)**

1 point for mentioning there are roadblocks, 2 points for specifics, 3 points for specifics AND what was done already to try to overcome them.

#### **Desired discussion points (2 points)**

1 point for at least one relevant discussion point as a general question, 2 points for relevant discussion points with specifics

#### **Future Goals (2 points)**

1 point for concrete future targets (i.e. "working more on the project" is a zero, but "working on getting component X to interface with component Y" suffices), 2 points for tying in the targets with what was hopefully discussed in the meeting.

### Time Spent (3 points)

1 point for including general statements of how much time was spent ("4 hours on coding"), 2 points for splitting time into specific parts ("1.5 hours on research on component X, 1 hour coding, 2.5 hours debugging"), 3 points for specific parts and details on the pieces ("1.5 hours researching Turtle interface for drawing concentric circles given inputs from the user, 1 hour coding function X that used that interface, 2.5 hours testing function X by giving it multiple values and fixing errors for values A, B, C, and D")

## **Weekly Total Time (1 point)**

#### **Total Project Time (2 points)**

1 point for summing the values correctly, 2 points for the total time AND reflection on progress (you are confident to fit the target and if not, what course corrections you anticipate needing to make)
